GEDAP/ SREP Coordinator  
Ministry of Energy**

**June, 2019.**

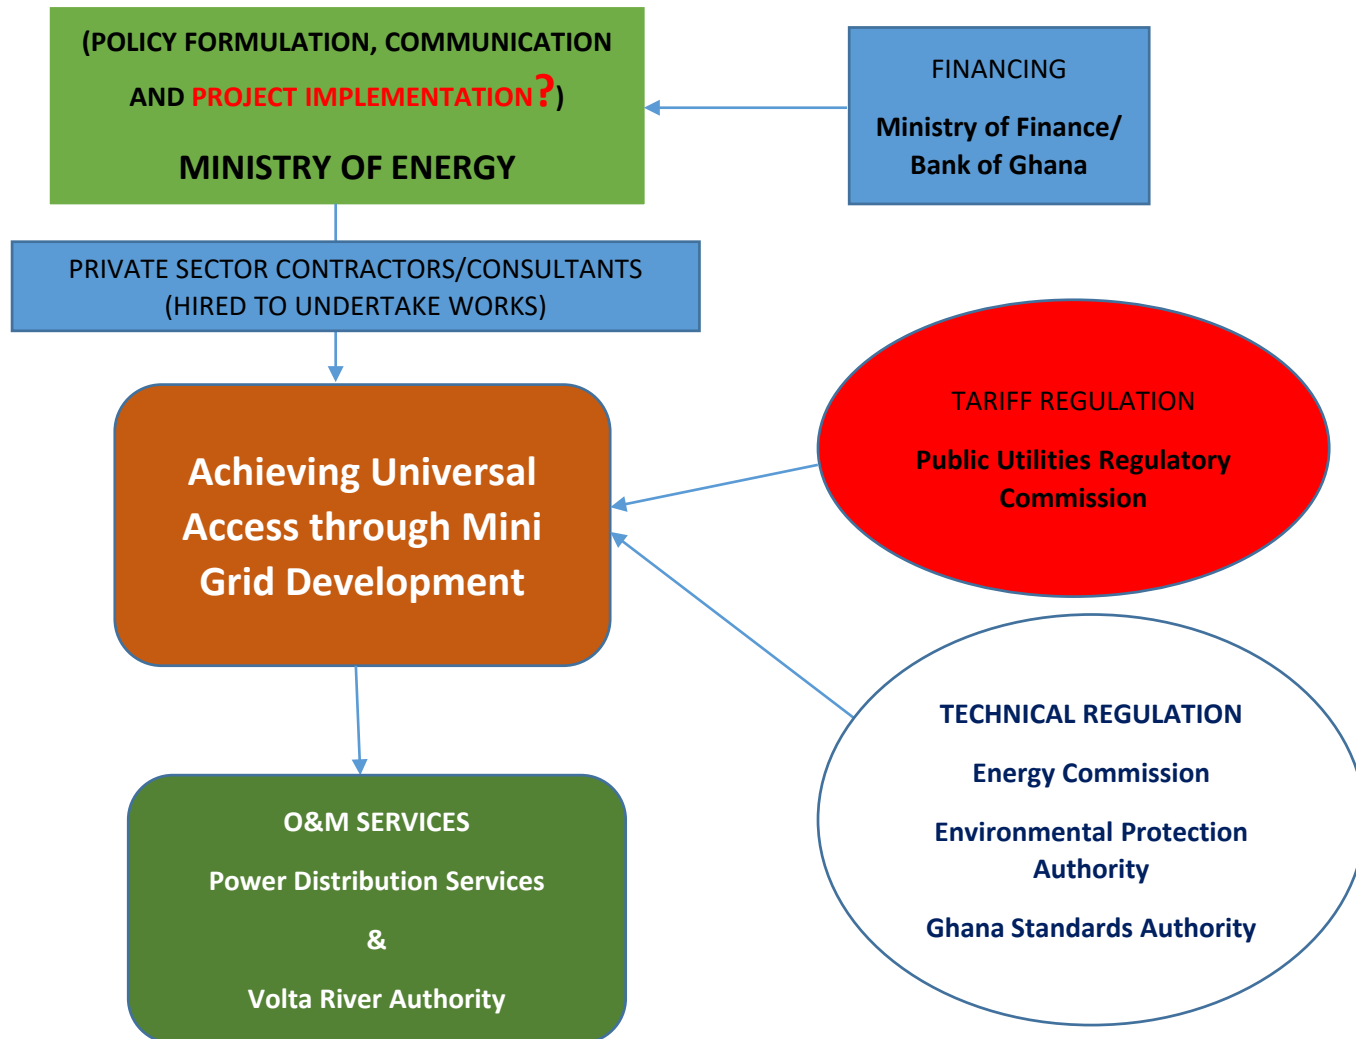

# Institutional Arrangement for Grid Extension

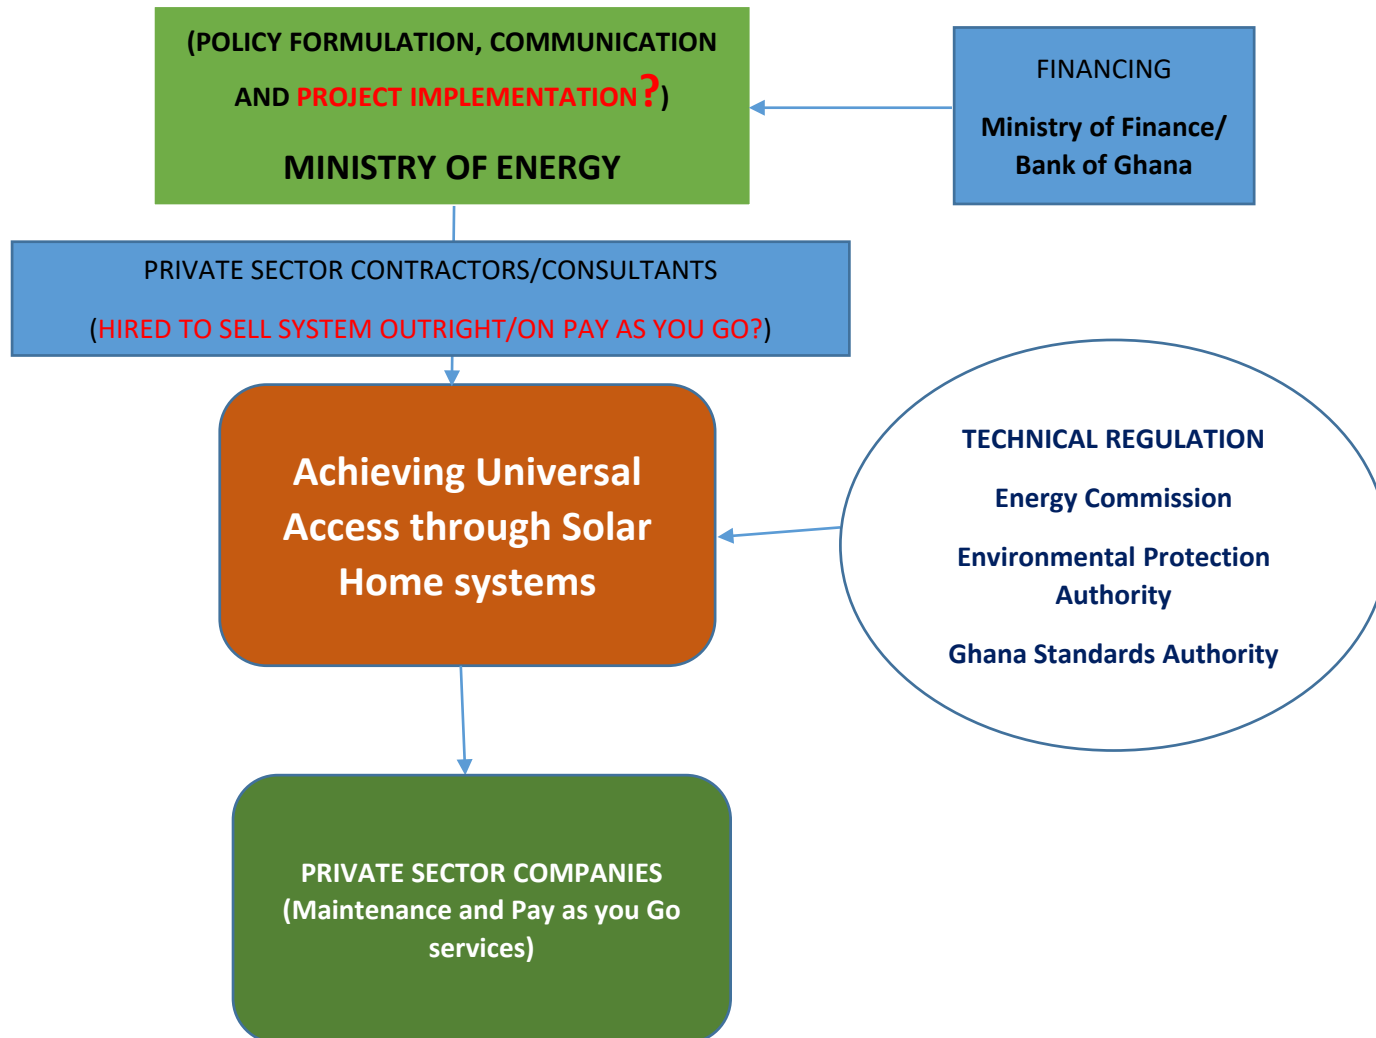

# Institutional Arrangement for Mini-Grid Systems

# Institutional Arrangement for Solar Home Systems

# KEY QUESTIONS TO BE ANSWERED

1. Should Ministry of Energy continue to directly implement projects or there is need for a Rural Electrification Agency?
2. Should Government encourage the private sector to invest funds in the provision of Mini Grid Systems towards Universal Access?
3. If Private sector is allowed to invest, who will OWN the Systems?
4. Should the provision of Solar Home Systems be through direct sales or Pay as you-go systems? Who caters for maintenance?
5. Should the PURC regulate the prices charged by Pay as you go SHS for electricity in communities?
